

JAIN DRIP GUIDE

Manufactured from tough engineering plastic material

Unique and snapfree drip line holding arrangement

suitable for 16 mm OD tubing

Guides the water coming out from the dripline to reach the appropriate location

Applications

- Suitable for driplines having single outlet with hole diameter varying from 1.2 to 1.5mm, minimum wall thickness of 0.7mm and depth of the drippers water bath shall be more than 2mm from the top surface of the tube (for example Jain Turbo Top, Jain Turbo Cascade)
- Suitable product for overhang drip lines. It helps to prevent the sliding of droplets.
 - Suitable for Nursery applications.
